

Job title: Security Technician / Supervisor - Harrisburg PA

Job type: Full-Time

Compensation/benefits: Compensation commensurate with knowledge and experience

Benefits: Family medical, dental, vision, 401(k)

Job Description

Job description: Nexus Technologies Group specializes in the design, installation and service of Integrated Security Management, Closed Circuit Television, Fire Alarm, and Network Communication Systems.

Currently, we are looking for an experienced, self-motivated Install/Service Technician with very strong computer/network skills to work in the Harrisburg area. Specific to security and fire, candidates must be proficient in trouble shooting, programming, and possess experience with large integrated systems. Candidates must have good communication skills to interface with customers, have the ability to work alone or as part of a team and manage projects. Experience with supervision of other technicians is a major plus, which includes daily scheduling of personnel and customer interaction. Professional appearance and demeanor, strong organizational and time management skills, and a positive, can-do attitude are required.

NICET I or II certification in fire alarm systems is preferred but consideration will be given to all applicants with relevant experience. BICSI Installer II certification is a plus. OEM considerations include Infographics, Lenel, AMAG, Verint, March Networks, Bosch, Silent Knight, and DMP.

Compensation commensurate with experience. Company offers a competitive compensation package including 401k, medical, dental & vision, systems training, and growth opportunities. Company cell phone and laptop are provided, as well as access to company vehicle as needs dictate.
